***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-28, 58-63, and 65-68, drawn to building a three dimensional model, classified in class 345, subclass 420.
  - II. Claims 29-57, drawn to a method for incrementally updating a file, classified in class 707, subclass 200.
  - III. Claim 64, drawn to a system for detecting a correcting drawing errors, classified in class 382, subclass 309.
  - IV. Claims 69 and 70, drawn to detecting or analyzing a feature associated with a drawing, classified in class 382, subclass 190.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II, III, and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable.
3. In the instant case, invention I has separate utility such as constructing a three dimensional model based from two dimensional information. See MPEP § 806.05(d).
4. In the instant case, invention II has separate utility such as managing a large number of files for database management. See MPEP § 806.05(d).
5. In the instant case, invention III has separate utility such as detecting errors in a two dimensional image. See MPEP § 806.05(d).

6. In the instant case, invention IV has separate utility such as detecting features in a two dimensional image. See MPEP § 806.05(d).

7. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

8. A telephone call was made to Mr. Ling Chwang (at phone number 972-744-2919) on 7/20/2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Daniel F. Hajnik whose telephone number is (571) 272-7642. The examiner can normally be reached on Mon-Fri (8:30A-5:00P).
